Tour Summary

Colonial Williamsburg is a reconstructed 18th-century village in the heart of Virginia's Historical Triangle. December is a particularly wonderful time to visit, with period decorations adorning every lintel and candles glowing from windows. Taverns invite guests in to enjoy 18th-century fare, seasoned with songs and games. Shops are bursting with reproduction goods, some of which are made right in the historical area. A stroll down the pedestrian Duke of Gloucester Street will send you back to colonial times, evoked through the sound of horses' hooves, the smell of woodsmoke, and insightful stories.

Introduction

Hello, and welcome to Colonial Williamsburg. Today we will be wandering the same streets that Thomas Jefferson wandered...

...seeing places where pirates were held captive...

...and where fine Virginia ladies and gentlemen danced the night away.

We will smell the warm scent of working horses in harness, and hear the heated debates of learned men arguing over independence.

We might even catch a whiff of 18th-century coffee wafting out of a tavern.

“CW” is a reconstructed 18th-century village in the heart of Williamsburg, Virginia.

December is a particularly wonderful month to visit, as the houses and buildings in the historical area have all been decorated for the holiday season with period-appropriate materials.

Fruits, evergreen boughs, and other 18th-century odds and ends are all waiting to be discovered throughout our tour.

Although a ticket is needed to enter certain sites, the streets are open for all to enjoy. Just be sure to watch your step, especially after the horses have gone by!
