Introduction

If you are living with a disability, you are all too aware of the difficulties that are presented by travel.

Despite the Americans with Disabilities Act of 1990, many vacations quickly become nightmares as you struggle with transportation, attraction restrictions, and other challenges.

Fortunately, Walt Disney World is a world leader in disability access.

At the Magic Kingdom and throughout the Resort,

you will find a virtually seamless network of accessibility options.

Of course, certain attractions do carry health restrictions of which you must be aware.

Additionally, the sheer range of options and choices can make the park feel overwhelming.

In this tour, a former Cast Member--Disney-speak for employee--will act as your personal guide.

You will learn to navigate the park like a pro,

choosing the attractions that are best for you.

Along the way, you will learn tips and tricks for minimizing wait times and controlling costs,

while discovering hidden secrets that are not always revealed to the general public.
